HOBBIES AND INTERESTS

I've always been eager to explore new experiences, which is why I'm constantly seeking out unfamiliar activities. My interest in computers stems from this curiosity. Ever since I was a kid, peering over my brother's shoulder as he played computer games, I've been fascinated by technology. However, it's only recently that I've had the opportunity to delve into programming myself. Beyond coding, I'm passionate about table tennis, enjoy taking leisurely walks, and love

flexing my creative muscles by designing imaginary games and crafting unique fictional stories. This mix of physical activity, outdoor appreciation, and creative pursuits keeps my life balanced and intellectually stimulating.
